

DANG LY PHUONG THAO

BUSINESS ANALYST

HCMC, Vietnam | dly77915@gmail.com | [LinkedIn](#) | [Portfolio](#)

Business Analyst bridging system architecture and user experience to optimize digital products. I excel in requirement analysis, process modeling, and cross-functional collaboration. My long-term vision is to advance as a Senior Business Analyst focused on E-commerce, translating complex business needs into actionable system features and driving operational excellence across diverse business domains.

EDUCATION

University of Economics Ho Chi Minh City (UEH)

Aug 2023 - December 2026

- Major in Enterprise Resource Planning

PROFESSIONAL EXPERIENCE

App Operations & Marketing Intern | KOCMATE

Jun 2025 - Sep 2025

- Collaborated with the Marketing team to optimized the customer journey by proposing the restructuring of the display interface and campaign workflows, facilitating smoother user navigation.
- Managed and standardized the display content for 25% of the products in the initial phase, ensuring visual and informational consistency aligned with the platform's UI/UX standards.

PROJECT EXPERIENCE

Odoo ERP Customization & Process Automation | HT Beauty Clinic

Apr 2026 - Jun 2026

Project Manager & Business Analyst

- Conducted business requirement elicitation, analyzed AS-IS current state, and built TO-BE processes, successfully identifying 46 GAPS in the clinic's operational workflows.
- Modeled system and data architecture using UML, DFD, and ERD for 5 custom modules: CRM, Appointment, Treatment, Automation, and Website.
- Proposed a solution architecture comprising 33 core functionalities with 42.43% being custom developments, effectively resolving resource conflict and double-booking issues.
- Designed automated workflows for customer care, including appointment reminders and post-treatment follow-up tasks, optimizing conversion rates and minimizing customer no-shows.

F&B Digital Ordering Solution Prototype | Tra Anh Beverage

Sep 2025 - Dec 2025

Business Analyst

- Elicited business requirements and modeled AS-IS processes using BPMN to resolve peak-hour bottlenecks caused by manual ordering, thereby proposing the "Order & Pick-up" mobile app solution.
- Designed comprehensive User Flows using Draw.io, optimizing the customer journey from menu selection and detailed beverage customization to the payment gateway.
- Managed the requirement lifecycle by building a Product Backlog and breaking down User Stories; created visual Wireframes/Mockups on Figma to ensure technical feasibility and a seamless user experience.

TOOLS & SKILLS

- BA Core Skills:** Requirement Elicitation, Process Modeling, Data Analysis.
- Documentation & Modeling:** BRD, FSD, User Stories, Use Case Specifications, Figma, Draw.io.
- Technical Skills:** PostgreSQL, Python.
